Before you begin, please note that it is not recommended that you change your infusion set just prior to bedtime. Changing your set during the day may reduce the risk of unexplained highs and no delivery alarms while sleeping. Please refer to the MiniMed® Quick-set™ Infusion Set User Guide for more details.

To change your MiniMed® Quick-set™ infusion set, you will need to organize the following supplies:

- Alcohol swabs/skin antiseptics
- Sharps bin
- Reservoir (with blue Transfer Guard)
- Insulin cartridge/vial (at room temp for 1 hour)
- MiniMed® Quick-set™ inserter (optional)
- MiniMed® Quick-set™ infusion set
- Alcohol swabs/skin antiseptics

**START HERE:**

1. Wash your hands. Press.
2. Select Reservoir & Tubing.
4. Remove the infusion set you have been using by loosening the adhesive and pulling away from body.
5. Remove the used reservoir from the pump.
6. FILL RESERVOIR & CONNECT TO THE INFUSION SET TUBING
Follow the next steps to fill reservoir with insulin and connect to the infusion set tubing.

   1. Remove infusion set from package.
   2. Make sure insulin vial is at room temperature to reduce the risk of air bubbles. (If using insulin cartridge proceed to step 6.)
   3. Pull plunger down to the amount that you plan to fill with insulin.
   5. Push and hold plunger down.
   6. If using insulin cartridge, skip to Step 6.
   7. If needed, pull plunger back down to amount of insulin needed for 2-3 days. To avoid getting insulin on the top of the reservoir, turn vial over so it is upright. Hold transfer guard and turn reservoir counter-clockwise and remove from transfer guard.

**IMPORTANT:** If insulin or any liquid gets inside the tubing connector, it can temporarily block the vents that allow the pump to properly fill the infusion set. This may result in the delivery of too little or too much insulin, which could cause hypoglycaemia or hyperglycaemia.

If using insulin vial only.

1. Remove infusion set from body.
2. Remove reservoir from pump.
3. Pull plunger down to the amount that you plan to fill with insulin.
5. Push and hold plunger down.

If using insulin cartridge, skip to Step 6.

1. Hold the reservoir upright. Push plunger into the reservoir to expel any air. Turn plunger slightly anti-clockwise to loosen it. Firmly press insulin cartridge onto blue transfer guard. Hold the reservoir and cartridge at eye level and using a pencil, push down on the rubber stopper of the cartridge to fill the reservoir.
2. With your thumb still on the plunger, flip over so vial is on top. Release thumb and pull plunger down to fill with insulin.
3. To avoid getting insulin on the top of the reservoir, turn vial over so it is upright. Hold transfer guard and turn reservoir counter-clockwise and remove from transfer guard.
4. If you see air bubbles, tap reservoir to move them to top. Push plunger just a bit to move them into tubing.

**CONNECT RESERVOIR TO INFUSION SET**
You will place the reservoir connector onto the end of the infusion set to the filled reservoir.

1. Gently push connector onto reservoir. Turn clockwise until locked. You will hear a click.
2. If you see air bubbles, tap reservoir to move them to top. Push plunger just a bit to move them into tubing.
3. Twist plunger counter-clockwise to loosen and remove.

Changing the Minimed® Quick-Set™ Infusion Set with the Minimed® 640G Insulin Pump

1. Select Load Reservoir and unlock pump if necessary.
2. Select Next.

LOAD RESERVOIR AND FILL TUBING
Follow these steps to load the reservoir and fill the tubing.

1. Select Load and keep holding.
2. When you see this screen, select Next.
3. Select Fill and keep holding until you see drops at the end of tubing, then let go.

4. Pull blue button down until you hear it click.
5. Choose an insertion site from the shaded areas shown here.
6. Wipe with alcohol or antiseptic.
7. Turn to loosen needle guard and pull.
8. Hold serter against cleaned site.
9. Press the two white buttons at the same time.
10. Press the blue button to release the infusion set from the serter.
11. Pull serter away from body. Press adhesive against skin.

Your infusion set change is now complete!
