START HERE

1. Wash your hands. Press \( \text{○} \). Select \text{Options}.

2. Select \text{Reservoir & Tubing}.

3. Select \text{New Reservoir}.

4. Remove the infusion set you have been using by loosening the adhesive and pulling away from body.

5. Remove the used reservoir from the pump.

6. Select \text{Rewind}.

NEW RESERVOIR

1. Remove infusion set from body.
2. Remove reservoir from pump.

FILL RESERVOIR & CONNECT TO THE INFUSION SET TUBING

Follow the next steps to fill reservoir with insulin and connect to the infusion set tubing.

1. Remove from package. Make sure insulin vial is at room temperature to reduce the risk of air bubbles.

2. Pull plunger down to the amount that you plan to fill with insulin.

4. Push and hold plunger down.

Continued on next page
Remove the infusion set from packaging by pulling down the red plastic tab.

Pull the paper tab to remove the sterile paper backing from the bottom.

Squeeze the three raised markings on both sides of the lid. Lift and remove.

Gently push the tubing connector onto reservoir. Turn clockwise until locked. You will hear a click.

If you see air bubbles, tap reservoir to move them to top. Push plunger just a bit to move them into tubing.

Twist the plunger counter-clockwise to loosen and remove.

With your thumb still on the plunger, flip over so vial is on top. Release thumb and pull plunger down to fill with insulin.

Tap the reservoir to move air bubbles to top of reservoir. Push plunger up to move air into vial.

If needed, pull plunger back down to amount of insulin needed for 2-3 days.

To avoid getting insulin on the top of the reservoir, turn vial over so it is upright. Hold transfer guard and turn reservoir counterclockwise and remove from transfer guard.

**WARNING:** If insulin or any liquid gets inside the tubing connector, it can temporarily block the vents that allow the pump to properly fill the infusion set. This may result in the delivery of too little or too much insulin, which could cause hyperglycaemia or hypoglycaemia.
THE BACKLIGHT MAY HAVE TURNED OFF
Press any button to turn the screen back on.

PLACE RESERVOIR INTO PUMP
Now place the filled reservoir into the reservoir compartment of the pump.

1. New Reservoir
3. Place reservoir into pump and lock.
DO NOT CONNECT TO BODY.

Load Reservoir
Enter BG
Basal
Audio Options
Status
Suspend Delivery

Select Load Reservoir from the menu.

Load Reservoir
Press ○ to open the menu. If the pump is locked, you will need to unlock the pump after pressing ○.

Select Next.

Turn clockwise until you feel reservoir lock into place.

Select Next.

LOAD RESERVOIR AND FILL TUBING
Follow these steps to load the reservoir and fill the tubing.

1. Load Reservoir
Select Load and keep holding ○.

Load Reservoir
Press ○ to open the menu. If the pump is locked, you will need to unlock the pump after pressing ○.

Select Next.

When you see this screen, select Next.

2. Fill Tubing
DO NOT CONNECT TO BODY. Hold Fill until drops appear. Then select Next.

Fill Tubing
Select Fill and keep holding ○ until you see drops at the end of tubing, then let go.

3. Drops at end of tubing

Fill Tubing
After you see drops, press ○ and select Next.

INSERT INFUSION SET

Next, follow the steps to insert the infusion set into your body.

1. Gently peel paper to expose the adhesive.
2. Place the tubing in slot on side of serter.
3. With other hand pull up on the center handle until it clicks and locks into place.

CAUTION: Be careful not to pull the tubing tightly when placing it in the slot.

4. Carefully hold the needle guard by tip. Gently turn the needle guard and pull to remove it.
5. Place the tubing in slot on side of serter.

Choose an insertion site from the shaded areas shown here. Wipe with alcohol or other antiseptic.

6. Place against prepared site on body. To insert, press the round indentations on each side of serter to insert needle.
7. Push down on center of serter to press adhesive against skin.
8. To remove serter, hold the center handle and gently pull it straight out away from body. Press the adhesive securely against skin.

Place the lid back onto serter to safely discard needle.

FILL CANNULA

You will now fill the cannula, the little tube under your skin, with insulin.

1 Fill Cannula?
   1. Insert infusion set into body.
   2. Select Fill to fill cannula or Done if not needed.
   Fill  Done

2 Fill Cannula
   1. Verify Fill amount.
   2. Select Fill Now when ready. Select Back to cancel.
   Fill amount  Fill Now

Select Fill.

Select Fill amount and enter:
- 0.300 if using 6mm cannula
- 0.500 if using 9mm cannula
Then press ✅.

3 Fill Cannula
   1. Verify Fill amount.
   2. Select Fill Now when ready. Select Back to cancel.
   Fill amount 0.300 u
   Fill Now

Select Fill Now.

4 Fill Cannula
   1. Verify Fill amount.
   2. Select Fill Now when ready. Select Back to cancel.
   Fill Cannula 0.025 u
   Total: 0.300 u
   Stop Filling

The Home screen displays the insulin as it fills the cannula.

Your infusion set change is now complete!
